AutoCAD Arch

L. HAL BLEVINS, III

Civil Designer - Raleigh, NC

Mr. Blevins has over 10 years' experience drafting site design drawings, construction drawing sets, civil site layout, and environmental drawings. He performs volume calculations and prepares grading plans on a routine basis. He is proficient with a variety of software design and mapping tools including AutoCAD and Civil3D

Mr. Blevins brings a decade of experience in AutoCAD software solutions across multiple industries. His experience began with high school drafting and working at his family's home construction business. His early career sparked interest in construction management yet over time, his experience focused on AutoCAD solutions eventually progressing to a civil designer.

Hal has used AutoCAD platform to support MEP firms, residential and commercial buildings, and in civil sitework plan sets. His design support has included standard details and sections for buildings, conformance with building codes, electrical and mechanical layout. Mr. Blevins is experienced in AutoCAD SolidWorks, Civil 3D, MEP, and Arch. Other experience includes working with local and state GIS systems, use of LIDAR data, and general knowledge of information technology systems.

Most recently, Mr. Blevins has assembled full design and construction sets for landfills in North Carolina, Georgia, and South Carolina while utilizing surface modeling features, assembling survey data, and topographic data to maximize waste volumes and generate earthwork balance volumes.
